

## An indispensable adaptor to test / check charging station

### Introduction:

MP-EVA, is an Electric Vehicle Supply Equipment Adaptor integrated with multi functions, not only can be connected with the 9 in 1 multi-function tester MP-MFT30 to test, but also compatible with any other meters.

Moreover, the adaptor can be used standalone to initially check whether the charging station can be connected and supply power output, It is an indispensable adaptor in tool box for property management; maintenance; installation or car owner.

**MP-EVA**

Integrated design

Easy to operate

Compatible to any test instruments

- Safe connection between charging station and instruments
- Suitable for various meters / instruments with / without EV function

Charging station

Multifunction Tester MFT-30 (9 in 1)

### Advanced Features

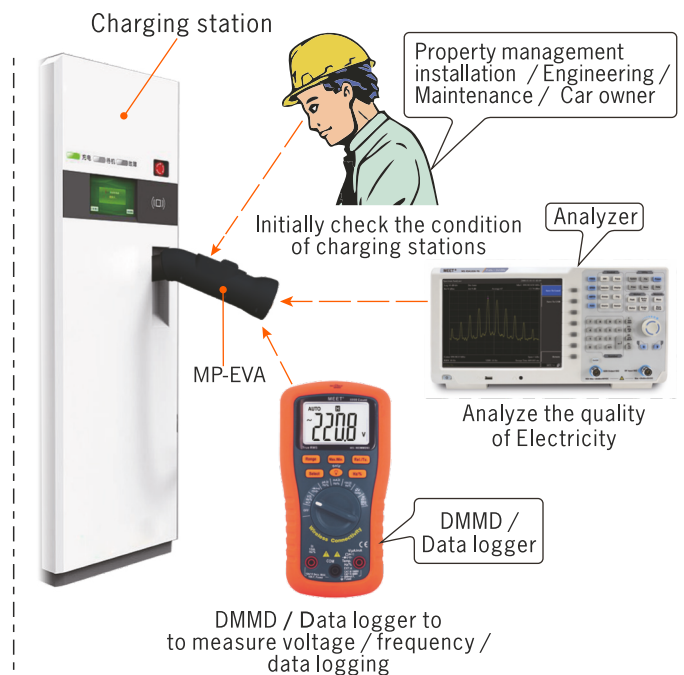

- Supply safe connection between charging station and instruments / meters
- Suitable for all kinds of EV instruments / meters / Data logger / Power Adaptor
- With Ø4MM terminals ( 3P + N + E ) easy to conduct various tests
- IEC62196-2, Type 2 connector
- CAT II 300V

### Specifications

Input voltage	Max 250V (single phase), Max 430V (three phase) 50/60Hz
Measurement Cat.	CAT II 300V
Double insulated	*
CE	Conformity to European Standards
UK CA	UKCA conformity assessed
Safety	EN 61010
EMC	EN 61326
Connector	IEC 62196-2 Type 2 male
Working temp.	0 - 40 deg C
Storage temp.	-10 - 50 deg C
Humidity	0 - 80% RH
Current Rating	10A Max

- Features and specifications are subject to change without prior notice.

### Wide Applications
