

Moisture Meter with Thermo-Hygrometer

Introduction :

Moisture meter is very useful to measure moisture content in wood / building material / paper / fabric / powder.

MS-98TS / MS-98TGS additionally integrated with pinless non-destructive type of sensor to measure moisture without damaging the surface, it penetrates upto 20mm depth from the surface, wide applications are:

- For locating water leaks behind walls, above ceilings and below floors.
- For wood working, measure moisture content before finishing, painting processing.
- For textile industries, regular check moisture content of fabrics and leathers, quality check to prevent mold.
- For printing industries, check moisture content of paper before printing.

MS-98T series

Quality control of paper before printing

Wood moisture content measurement

Trace water leakage on walls, floors, ceiling, carpet

Monitor molds on fabric and garment

Pin type measurement

Non-destructive measure moisture content (for MS-98TS/ MS-98TGS only)
