

## Handheld Thermal Camera with Data Logger

(Auto Trace Hot / Cold Object Temperatures)

Auto Trace Temp.

13.8°C

Auto trace Cold or Hot

Temp. measured 13.8°C at a 198cm distance away (13.8°C / 198cm)

Wireless Connectivity Thermal Camera MS-WITC8C / MS-WITC8CL is designed for use in wide applications such as for Electrical distribution board; Temperature controlled room; Water flows inside basement; Water leaks under roof / ceiling / walls / ground floor inside plant room; warehouse etc.

One of the most advance features of MS-WITC8C / MS-WITC8CL is real time sharing and storing data measured with picture through hot spot of Smartphone or WiFi router connection.

Air-conditioning; HVAC

**Bushar: Terminal** Link connection

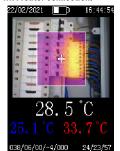

Temp. Controlled Rm.; Warehouse; Laboratory

169/18/00/00/000

Main switch: Motor: Contactor

Electrical / Electronic maintenance / repair

Wiring connection: MCB: RCD

# object temperatures

Fault finding of Loose connection inside the

temperature, such as MCB,

Precisely find heat map in a circuit, such as in Link / Busbar connection

MS-WITC8CL

Model No.: MS-WITC8C

MS-WITC8CL

Auto Trace Water Leaks

Auto trace water leaks, under ceiling; walls; ground floor; basement.

#### Data Logger

Data Logging, Auto trace and capture water leaks (low temp.) every 60 seconds and stored in micro SD card

Data Logging, Auto trace and capture water leaks (high temp.) every 60 seconds and stored in micro SD card

Tripod Screw

YouTube MEET International LTD

and Refrigerator Industry

### **SPECIFICATIONS** MS-WITC8C

MS-WITC8CL Model No.: Real time snap and store data measured with picture through hot spot of Smartphone or WiFi

| 1 | router connection                                       |   |      |

|   | Thermal image detector                                  | Low power CMOS, shutterless                 |      |
| I | Thermal image resolution                                | 80(H) x 62(V), 4960 pixels                  |      |
|   | Spectral response                                       | 8 - 14 µm (Thermal LWIR)                    |      |
|   | Measure object temperature range /<br>Resolution (min.) | -20°C ~ 1000°C (-4°F ~ 1832°F) / 0.1°C (°F) |      |
| J | Distance to object measurement display                  |   | ala. |

(1cm ~ 320cm)

Ambient temperature and humidity display : -20°C (-4°F)  $\sim$  > 60°C (140°F) / 20%  $\sim$  99%RH Auto trace 'Hot' or 'Cold' temp. area with / without thermal in picture; max. temp. icon <sup>Z</sup>indication and data display

Auto trace Max. + Min. and target temp. display

Target pointer (center) temp. display

Auto trace 'Hot' or 'Cold' temp. with Red or Blue isotherm display at grey palette

Alarm set, auto trace high or low temp. with beep and or laser pointer trigger

(for MS-WITC8CL)

Remotely selectable function mode through Smartphone / Tablet / PC

Data logging, auto trace and capture high or low temp. every 60 seconds. and stored in micro SD card

Adjustable emissivity : 0.1~0.99

Self Temperature Compensation adjust by manually input for accurate / comparison or

Fixed focus distance : 0.5M

Color palette : White Hot / Fulgurite / Rainbow / IronRed / (Red /Blue) isotherm map on grey or visual display

Low battery and charging status display

Image frequency: ≤9Hz

Image storage / File format : Micro SD card (not include, up to 32G) / BMP

1/4 " screw for tripod

Operating conditions / Storage conditions 0°C to 40°C (32°F to 104°F); 10% to 80%RH Type "C" USB input for charging or continuous operation, 5V, DC / 1A

Rechargeable 3.7V / 1100 mAH polymer battery included, Battery type and operating duration (continuous operating approx. 90 minutes) Dimensions (LxWxD)mm (approx.) 185 x 115 x 52 Weight (approx.) grams

- Features and specifications are subject to change without prior notice.

## Handheld Thermal Camera with Data Logger

(Auto Trace Hot / Cold Object Temperatures)

Full information display on screen and able to remotely control function mode
